- Rear axle springs with height-adjustable threaded spring perches
- Anti-roll bar drop links are included

General information on Lowtec sports suspension kits and coilover suspension kits: On vehicles equipped with factory-fitted electronic damper control, a Lowtec sports suspension kit or coilover suspension kit can only be installed in conjunction with a suitable electronic cancellation kit. The cancellation kit is not included.

The lowering values stated are based on vehicles in new condition with standard factory suspension. On vehicles equipped with a factory-fitted sports suspension (e.g. Audi S line, BMW M Sport suspension, Mercedes-AMG Line, Hyundai N Line, VW R-Line, Ford ST-Line, etc.), the actual additional lowering will be correspondingly less.

For coilover suspension kits, the stated lowering values indicate the approximate adjustment range between the minimum and maximum lowering settings and apply to the entire model range. The actual values achievable may therefore vary depending on the vehicle model and specification.

Example: A stated lowering range of 0?60 mm may result in an actual adjustment range of 0?50 mm on one vehicle variant and 10?60 mm on another.
