VW GOLF 6 1.6 TDI (66kW) - K&N 57i PERFORMANCE KIT

Item #: KN-57-0618-1_11475_

VW GOLF 6 1.6 TDI (66kW) - K&N 57i PERFORMANCE KIT

Manufacturer: K&N

Price: CHF339.00 inc VAT (CHF313.60 ex VAT)

K&N 57i Performance Kit 57-0618-1

- Price includes an original K&N 57i Performance Kit

to fit the following car:

- VW Golf 6
- Model Year: 5.2009 - 1.2014
- Engine & Power: 1.6 TDI (66kW|90HP)

Informations, notes, remarks & restrictions:

- --

Product information:

Designed to Increase HP and Acceleration
Engineered to Specific Vehicle Design
Easy to Install, Usually in 90 minutes or less!
Lasts up to 100,000 Miles Before Service is Required (depending on driving conditions)
High Performance Induction System
Million Mile Limited Warranty®
Replaces OEM Filter and Air Box
Air Filter is Washable and Reusable
Works with Original Equipment Manufacturer Computer Systems
Non street legal

- K&N Product #: 57-0618-1

K&N 57i Series induction kits are specifically designed for each different vehicle and will free your car from the size restriction that comes with the factory air box. These economical kits can take a variety of different forms based on vehicle characteristics and available space under the hood. Each kit is designed to provide power throughout the RPM range. The extra surfaces area of these open-air air filters provides even more airflow at lower restriction than a K&N O/E replacement filter which is limited to the size of the factory air box. The larger air filter also captures and holds more dirt increasing its service life before a cleaning is required (up to 100,000 miles). The filter is either directly attached to the engine carburetor or throttle body or indirectly through a tube assembly running from the filter to the engine. All adapters are made from high quality materials such as steel, aluminum, silicon or reinforced nylon to ensure long life.
