FIAT SEDICI 2.0 D MultiJet - BOOSTRPRO CHIP TUNING

Item #: A063.589_(FY)

FIAT SEDICI 2.0 D MultiJet - BOOSTRPRO CHIP TUNING

Manufacturer: DTE SYSTEMS

Price: CHF359.00 inc VAT (CHF332.10 ex VAT)

Performance Chip Tuning BoostrPro Box made by DTE Systems Germany

- Fiat Sedici 2.0 D MultiJet
- Model Year: 06.2006 - 10.2014
- Original Power: 99kW | 135HP | 320Nm

Remarks & Information (strictly to observe):

- --

Product Specification

- BoostrPro Chip Tuning Box with 6 performance profiles via Keypad
- Item #: A063.589

Performance Optimization

- +16kW
- +22HP
- +48Nm

Product Information

- High Quality Product made by DTE Systems - Multiple award-winning Manufacturer from Germany
- In-house development
- Comes without CH-Approval-Paperwork - Non street legal
- Easy installation with OEM quality adapter looms and illustrated instructions
- Including warranty on engine
- Integrated Active Power Management
- High-precision microcontroller
- Power & Current Limitation to protect connected engine components
- High in-house map Optimisation for maximum efficiency

Manufacturer Information

More power with BoostrPro chip tuning
BoostrPro is the best choice for a performance enhancement with a chip tuning box for your vehicle. The BoostrPro chip tuning is an additional control unit that is interposed between the engine sensors and the engine control unit (ECU).

By optimizing boost pressure and injection, chip tuning with BoostrPro achieves a performance increase of up to 25%. At the same time, fuel consumption is reduced by up to 1l/100km.

Easy installation. Immediate fun
The chip tuning installation of the BoostrPro chip tuning box succeeds in a few simple steps. A step-by-step illustrated manual accompanies the BoostrPro chip tuning. - The residue-free removal to the original settings is done quickly and easily, e.g. at vehicle change. The BoostrPro tuning is available for many common petrol and diesel vehicles.

BoostrPro has over 20 years of experience
BoostrPro is a specialist for power electronics and a renowned tuning brand in Germany. With technical innovations, BoostrPro ensures improved overall performance of modern cars combined with a high degree of safety.

We develop our innovative tuning software on our modern dynamometer. We can offer suitable BoostrPro tuning for many

FIAT SEDICI 2.0 D MultiJet - BOOSTRPRO CHIP TUNING

common petrol and diesel vehicles. During the production process, our tuning products have to pass strict quality controls. Before delivery, our tuning products are 100% tested for safety and function.

Up to 1l/100km less consumption
More power and a higher torque allow a driving style with significantly lower rpm on average. This significantly reduces consumption. In addition, the BoostrPro tuning can also be used without restriction on vehicles with particle filter. Thus, it is possible to comply with the legal and vehicle emission values.

Safety is standard
BoostrPro creates the confidence and reliability you need to increase your vehicle's performance. At the same time, tuning with BoostrPro always remains within specified limits that are not exceeded.

An integrated safety feature ensures constant monitoring of the connected sensors in every driving situation. So you can be sure that BoostrPro will reliably deliver you more power.

During the entire development, our tuning products are tested under the toughest conditions and tested to strict standards. The result is a tuning module that meets the high safety requirements.

Tuning – Made in Germany
BoostrPro is a premium quality product made in Germany. Our tuning products are developed and tested to meet the highest quality standards. BoostrPro is the result of our many years of experience and consistent technological development.

The BoostrPro control unit has a super-fast processing speed with its own firmware developed in-house. In addition to easy commissioning and easy controllability, the uncompromising quality of workmanship is a particularly outstanding feature.
