K&N 57-1136 K&N Performance Air Intake System

Hersteller: K&N

Preis: CHF399.00 inkl. MWST. (CHF369.10 8.1 % MWST sind im Preis enthalten)

57-1136 K&N Performance Air Intake System

The K&N 57-1136 cold air intake system replaces the factory air filter and air intake housing in many Polaris Ranger RZR models for a guaranteed increase in horsepower and torque.

A free-flowing aluminum intake tube helps increase the volume of airflow to your engine. The system is paired with a washable, reusable High-Flow Air Filter™ featuring oiled cotton filter media, which is protected by an enclosed filter housing for additional protection from heat and the elements.

The oversized, conical filter design allows you to go up to 100,000 miles between filter services under normal highway driving conditions. Can typically be installed in 90 minutes or less using standard hand tools

More Information

- Guaranteed to increase horsepower and torque
- Free-flowing aluminum intake tube
- Designed to improve throttle response and engine sound
- Engineered to provide high airflow and exceptional filtration
- Filter only requires cleaning every 100,000 miles under normal highway driving conditions
- Typical installation can be completed in 90 minutes or less with simple hand tools
- 10-Year/Million Mile Limited Warranty

Specifications

- Estimated Horsepower Gain_ 4.09 HP @ 35.8 MPH
- Replacement Filter: RU-5064
- Air Filter Color: Red
- Air Filter Material: Cotton Gauze
- Warranty: 1,000,000 Miles/10 Year
- Product Style: Motorcycle Intake System
- Air Filter Outlet Shape: Round
- Intake Pipe Color / Finish: Textured Black
- Intake Pipe Material: Aluminum
- Clamps Included: 9
- Clamp Style: Worm Gear
- Clamp Material: Stainless Steel
- Weight: 5.8kG

K&N 57-1136 K&N Performance Air Intake System

- Couplers Included: 2
- Mounting Hardware Included: Yes
